

Empowering your trading strategy to thrive in a global market.

Trading is a hyper-competitive world where the difference between success and failure is measured in milliseconds.

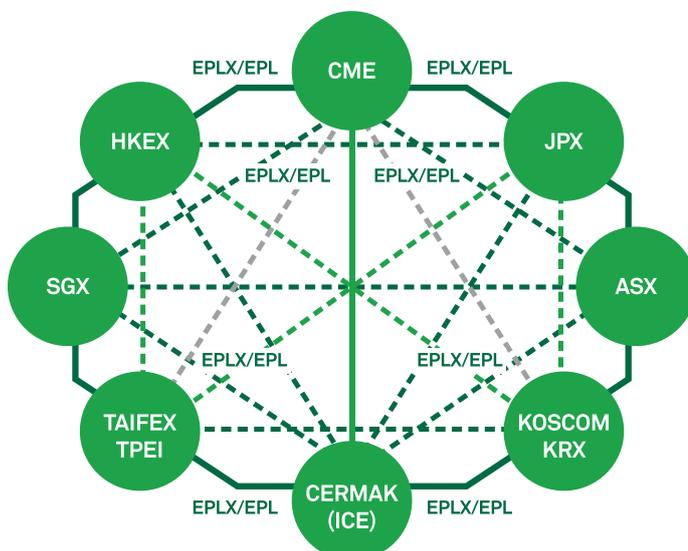

Telstra gives you the speed to succeed with direct access to the low latency cables that connect some of the world's leading exchanges.

That's why we created the Telstra Octagon, a snapshot of some of the world's leading futures exchanges.

Introducing the Telstra Octagon: Commodities & Equities Low Latency Trading Solution.

Only Telstra offers ownership of subsea cable routes and low latency backhaul fibers into exchanges across the Telstra Octagon.

Because we own the lowest latency cables connecting key Asian exchanges, you get unparalleled financial performance to speed up price discovery, risk analysis, smart order routing, order flow, order matching, execution, and settlement.

Trade futures and more, faster.

Consisting of eight of the world's most valuable futures marketplaces, the Telstra Octagon represents more than a trillion dollars in contracts traded across member exchanges every day. The Telstra Octagon includes key exchanges in:

Australia (ASX)

Singapore (SGX)

Japan (JPX)

The United States
(CME; CERMAK ICE)

Taiwan (TAIFEX)

Hong Kong (HKX)

South Korea (KRX)

The low latency network underpinning the Telstra Octagon empowers you to deliver investment strategies and create an edge in execution across all major asset classes throughout Asian, Australian, and US capital markets.

You get the benefit of priority end-to-end access to the networks connecting your key markets, so you can capture efficiencies and dynamically respond to market-moving events as they happen.

That's why when you think about trading futures in Asia, you should think about Telstra.

We have a long history of investment in the Americas. In fact, this year marks our **25th anniversary** here!

Telstra has people in **13** states and offices in **6** major US cities, including New York, San Francisco and Washington DC.

All in all we deliver.

6,000
services

to **500**
customers

across **160** cities
in the Americas
